

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Middlesex, Suffolk, and Essex Senatorial District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Middlesex, Suffolk, and Essex Senatorial District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; 23.8% (29,682) of these admissions reside in the Middlesex, Suffolk, and Essex Senatorial District. 1.2% (371) of admissions from the Middlesex, Suffolk, and Essex Senatorial District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from Middlesex, Suffolk, and Essex Senatorial District reported the following characteristics:

- 77% were male and 23% were female.
- 64% were between the ages of 30-49.
- 52% were white non-Latino, 27% were black non-Latino, 17% were Latino, and 4% were other racial categories.
- 71% were never married, 10% were married, and 18% reported not to be married now.
- 32% had less than high school education, 51% completed high school, and 17% had more than high school education.
- 15% were employed.
- 35% were homeless.
- 21% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Middlesex, Suffolk, and Essex Senatorial District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	40%	43%	4%	4%	5%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, including the prevalence of injection drug users (IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2002							
Middlesex, Suffolk, and Essex Senatorial District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	27,655	21,373	7,904	11,224	7,974	8,985	5,596
FY '96	28,169	21,201	7,745	10,648	7,905	9,757	5,948
FY '97	29,253	22,510	7,688	9,828	7,758	9,752	6,327
FY '98	29,061	21,501	7,285	8,813	6,361	10,874	7,216
FY '99	28,218	20,843	6,703	8,676	5,927	11,204	7,309
FY '00	28,323	20,426	6,422	8,112	5,301	11,654	7,678
FY '01	29,509	20,449	6,660	7,971	4,911	13,170	8,091
FY '02	29,682	19,554	6,042	7,749	4,810	14,208	9,457

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the Middlesex, Suffolk, and Essex Senatorial District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
